

ABDEL RAHMAN SALEH

JUNIOR SOFTWARE & WEB DEVELOPER

Irbid, Jordan | Jordanian | Open to Relocation | +962 79 532 1462 | aboosaleh171@gmail.com

PROFESSIONAL SUMMARY

Computer Engineering graduate and Junior Software & Web Developer with hands-on experience delivering 10+ client websites and contributing to web applications using Angular, WordPress, Node.js, Firebase, PostgreSQL, and REST APIs. Experienced in responsive front-end development, CMS customization, workflow integrations, technical troubleshooting, performance optimization, and deployment support. Strong problem-solving skills with practical exposure to Agile delivery, client requirements, and mentoring junior trainees.

TECHNICAL SKILLS

Programming	JavaScript, TypeScript, Go, Python, PHP, C#, C/C++
Web & CMS	Angular, Node.js, Express.js, Next.js, Django, WordPress, Elementor, HTMX, HTML5, CSS3, Bootstrap
Databases & Integration	PostgreSQL, Firebase/Firestore, SQL Server, SQLite, MySQL, REST APIs, Webhooks, MQTT
DevOps & Systems	Git/GitHub, Docker, Linux, Nginx, PM2, cPanel, IIS, DNS, SSL, AWS and Google Cloud basics
Professional	Agile/Scrum, Jira, Confluence, requirements analysis, debugging, technical documentation, teamwork

PROFESSIONAL EXPERIENCE

Junior Web Developer | Tulips Technologies

Jan 2026 - Present

- Built, launched, and maintained 10+ responsive client websites using WordPress, Elementor, Angular, HTML, CSS, JavaScript, and Bootstrap.
- Contributed to Angular and Node.js applications, including role-based dashboards, admin interfaces, Firebase integration, and PostgreSQL-backed modules.
- Customized WordPress themes, configured plugins, managed multilingual content, and improved SEO, caching, image optimization, accessibility, and page performance.
- Implemented and supported REST API, webhook, and WhatsApp workflow integrations for multi-role business processes and automated reminders.
- Resolved production issues involving application logic, contact forms, plugin conflicts, SSL certificates, DNS, hosting, cPanel, and cross-device behavior.
- Translated client requirements into technical features, coordinated with designers and developers, and mentored interns in WordPress, Angular, Node.js, Firebase, and PostgreSQL.

Web Developer Trainee | Tulips Technologies

Nov 2025 - Dec 2025

- Developed three complete client websites using WordPress and Angular, including responsive page creation, theme customization, content management, and device testing.

Technical Support Intern | Sky Software

Aug 2025 - Sep 2025

- Used SQL, IIS, IP, DNS, and troubleshooting tools in web-application support simulations covering support tickets, server issues, and data queries.

Software Project Management Intern | Quark Software

Feb 2025 - May 2025

- Applied Agile and Scrum practices, wrote project proposals and user stories, built Gantt and estimation plans, and used Jira, Zoho Cliq, and Confluence.

SELECTED PROJECTS

GrowPulse IoT Monitoring Platform | Angular, Node.js, Firebase, MQTT

- Enhanced role-based dashboards, real-time sensor alerts, cross-component data refresh, and actuator-control workflows.
- Created MQTT test scenarios for normal and critical readings and supported alert handling, session timeouts, and concurrency fixes.

SELECTED PROJECTS (CONTINUED)

Operations & WhatsApp Workflow Platform | PHP, MySQL, REST APIs, Webhooks

- Developed multi-role workflows for customers, engineers, workers, and finance teams, with immediate response persistence and secure webhook handling.
- Implemented idempotency, payment-verification stages, automated reminders, worker assignment, and post-service follow-up flows.

Tulips Accounting Suite | Angular, Node.js, PostgreSQL, Docker, Nginx

- Contributed to an accounting web application and supported authentication, security hardening, application configuration, and testing.
- Prepared Docker, Nginx, PM2, PostgreSQL, and Google Cloud deployment documentation for a low-cost test environment.

Client Website Portfolio | WordPress, Angular, Elementor

- Delivered and maintained 10+ client websites, including corporate, marketing, e-commerce, and bilingual content websites.
- Handled responsive UI, theme customization, forms, analytics, SSL, DNS, SEO, speed optimization, security updates, and ongoing maintenance.

Barbershop Management System | Django, Python, SQL

- Designed a multi-branch management platform with online booking, virtual queues, staff scheduling, inventory, customer profiles, loyalty, and reporting features.

ADDITIONAL TRAINING

Software Development Trainee | MBAI YU Innovation Hub

Sep 2024 - Dec 2024

- Built Go and HTMX applications including CRUD systems, user management, an e-commerce platform, a ticketing system, and task-management projects.
- Participated in Entrepreneurship Hackathon 2024 and NVIDIA-certified workshops in deep learning and CUDA programming.

EDUCATION

B.Eng. in Computer Engineering | Yarmouk University, Jordan

2020 - 2025

GPA: 85.90% (Excellent)

COURSES & CERTIFICATIONS

- NVIDIA Fundamentals of Deep Learning
- NVIDIA Fundamentals of Accelerated Computing with CUDA C/C++
- WordPress Basics and Advanced WordPress Concepts - Learn WordPress
- AWS Cloud Practitioner Essentials - Course

LANGUAGES

Arabic: Native | English: Good working proficiency
